

FRP ADVANTAGES

- ▶ Economic cost
- ▶ Termite, Rust and water resistant,
- ▶ Low Maintenance and long durable
- ▶ Easy installation and fabrication
- ▶ Light weight composite
- ▶ No colour fade due to UV
- ▶ Maximum Strength with low weight
- ▶ Glossy and polished surface
- ▶ Fire retardant
- ▶ Easy to mould and demould

INTENT

*Shree Sabari Fibres
Products Worth to Investment
for New Generations.
Safe for green India
We decided to provide
problem based solutions
for requirement*

PROPERTIES OF FIBERGLASS

DESIGN FREEDOM

High degree of design flexibility of fiberglass are endless, Fiberglass for creative designers. Its easily tooled, moulded and manufactured to specifications.

AFFORDABILITY

This design freedom to work make fiberglass an economical alternative for the manufacture. The lightweight strength of fiberglass has a popular for manufacturing. Fiberglass offers various advantages. Industries are benefiting of its versatility.

STRENGTH & DURABILITY

High strength with low weight, high flexural strength. Fiberglass is lightweight material that builds strength into finished product or component. Fiberglass reinforced plastic products provide better performance than other materials like wood, Rubber and metal.

FRP Lining

- ⇒ Inspection
- ⇒ Surface Repair
- ⇒ Glass Fibre Wrapping
- ⇒ Surface Matting
- ⇒ Smooth Top Coat
- ⇒ Cleaning & Finishing
